12. Note the attached Information Disclosure Statement(s). (PTO/SB/08 or PTO-1449) Paper No(s)							

It is noted that applicants have filed an Amendment after the Final Rejection on 7/12/05; applicants' attorney has addressed the issues of record. The proposed amendment will NOT be entered ;and, it is not in a condition for allowance.

The Status of Claims:

Claims 1, 3-4,9,13-15,18-43, and 58 are pending.

Claims 22, and 24 have been rejected.

Claims 1, 3-4, 9,13-15, 18-21, 23, 25-30, 39, 40, and 43 have been objected.

Claims 31-38, 41-42, and 58 will be allowable.

Claim Objections

The objection of Claims 1, 9, and 43 can be overcome with the proposed modification in the amendment.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

The rejection of Claim 22 under 35 U.S.C. 112, second paragraph can be overcome with the proposed modification in the amendment. However, the rejection of

Application/Control Number: 09/673,411

Art Unit: 1625

Claim 24 under 35 U.S.C. 112, second paragraph has been maintained due to applicants' failure to modify the claim in the amendment.

Furthermore, there is still some issue to be resolved with claim 20.

In claim 20, the phrase "an enzymatic effect" is recited. This is vague and indefinite because the specification does not elaborate how the active ingredient has "an enzymatic effect". Therefore, an appropriate correction is required.

The new issue

The phrase "A pharmaceutical composition comprising, <u>in addition to</u> one or more pharmaceutically active ingredients" in claim 1 raises a new issue that would require further consideration and search.

Applicants argue the following issues:

- a. Claim 22 is amended to specify that the antineoplastic adjunct drug consists of folic acid replenishers, rather than includes them, thereby clarifying the composition of the antineoplastic adjunct drug.
- b. The expression "comprises " was replaced by the expression "is" in claim 24 in the prior art amendment; therefore, there is an error on the basis for the rejection.

Application/Control Number: 09/673,411

Art Unit: 1625

Applicants' arguments have been noted, but the arguments are not persuasive.

First, regarding the first argument, the Examiner has agreed that the proposed modification in the amendment can overcome the rejection.

Second, regarding the second argument, the Examiner has noted applicants' argument. However, the proposed amendment has still shown the word "comprises" in claim 24 unlike applicants' argument as shown below:

24. (As amended) A method as claimed in Claim 13, wherein the active ingredient is an anthelmintic that is effective against Cestodes, Nematodes, Onchocerca, Schistosoma, or Trematodes, or wherein the active ingredient comprises an antiprotozoal drug that is effective against Leshmania, Trichomonas, Trypanosma, or a combination thereof.

Allowable Subject Matters Proposed by the Examiner

In claims 1, 31, 32, and 58, the phrase "the one or more active ingredients" is recited. The specification has disclosed only five active ingredients in the topical formulations containing anti-inflammatory drugs: Ketoprofen, diclofenac Sodium, Ibuprofen, Etodolic Acid, and Piroxicam and the claimed PFPE compound, and etc. There are no other active ingredients which have been exemplified in order to show the workability of the various active ingredients present in the formulations. Therefore, the rejection based on the scope of enablement of the claimed invention under 35 U.S.C. 112, first paragraph, can be applied because the specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly

Application/Control Number: 09/673,411

Art Unit: 1625

3,411 Page 5

connected, other active ingredients unrelated to the currently claimed invention commensurate in scope with these claims.

However, in order to expedite the prosecution of the case to be allowable, the examiner recommends to add the only five active ingredients into the claims 1, 31, 32, and 58 with the cancellation of the other active ingredients in the claims 20-22. Until the issues are resolved, the allowance of the application will be delayed.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Taylor Victor Oh whose telephone number is 571-272-0689. The examiner can normally be reached on 8:30-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Cecilia Tsang can be reached on. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
